PACKAGES

Currency Convertor
currency-exchange-
conversion@github | PHP, MYSQL
Used to convert any currency as base to
any other currency.

SUMMARY

I am a highly skilled Software Engineer with a Bachelor of Computer Science from the University of Punjab. With extensive experience in technologies such as JavaScript, PHP, and Python, I have a proven track record of successfully building web and mobile applications, RESTful APIs, web scraping tools, and web testing tools. I have also been actively involved in contributing to various technical communities since 2018.

WORK EXPERIENCE (3+ YEARS)

SOFTWARE ENGINEER

RipeSeed | January 2023 - Present
Building next-gen cloud web and mobile apps using various cloud technologies.

SOFTWARE ENGINEER

Wellcreator | Feb 2020 - December 2022 (2 years 11 months)
I developed and implemented a variety of web and mobile applications utilizing various technologies. Additionally, I managed a team of junior developers and interns, and was responsible for server deployment and database optimization.

NETWORK ADMIN

Master Comm. | Nov 2019 - Feb 2020 (4 months)
Managed and maintained networking infrastructure, including configuring and troubleshooting network traffic to ensure optimal performance, and established new and maintained existing connections.
