Senior Software Engineer specializing in AI-powered SaaS platforms, full-stack development, and scalable backend architectures. Experienced in building chatbots, voice agents, and automation workflows, with proven impact in international remote teams.

Technical Skills

JavaScript/TypeScript, Python, PHP — Generative AI, Automation (n8n) — Next.js (SSR/SSG), React, React Native — FastAPI, Node.js (Express, NestJS) — PostgreSQL, MySQL, MongoDB, Redis, Supabase/Firebase — AWS, GitHub Actions, Docker

Experience

Stealth AI Startup — May 2025 - Present
Senior Software Engineer — *Remote (United States)*
- Led development of multiple AI-powered products, including conversational chatbots and voice agents, taking features from prototype to production.
- Designed and evolved scalable AI backend architectures using Python, LLM integrations, and real-time workflows.
- Reviewed and improved system architecture by identifying performance, scalability, and reliability gaps, implementing long-term fixes.

eesel AI — Apr. 2025 - Dec. 2025
Software Engineer — *Remote (Australia)*
- Built frontend integrations and AI-powered sales chatbots for Shopify merchants, enabling automated customer engagement and lead conversion.
- Improved helpdesk integrations by enhancing workflows and third-party API connectivity.
- Owned UI improvements and resolved critical production bugs, improving platform stability and customer experience.

Mir Tech — Feb. 2024 - May 2025
Full Stack Developer — *Remote (Kuala Lumpur, Malaysia)*
- Delivered performance and reliability improvements across multiple production applications with paying users, achieving sub-second page loads and 99% uptime.
- Designed and built the resourcing module for Jensi, enabling automated staff allocation and significantly reducing manual matching time.

RipeSeed — Jan. 2023 - Feb. 2024
Software Engineer — *Lahore, Pakistan*
- Transitioned into Client Success after probation; led multiple end-to-end projects that generated $22K+ in revenue.
- Built a Next.js SaaS platform with real-time Supabase authentication and Flask-powered newsletter automation, processing 10 monthly campaigns and boosting engagement by 20%.

AZI Solutions — Mar. 2020 - Dec. 2022
Associate Software Engineer — *Lahore, Pakistan*
- Developed and maintained MERN stack web applications and React Native mobile apps, processing 700+ monthly transactions via Stripe, PayPal, and JazzCash.
- Supported production systems through proactive monitoring, deployments, and infrastructure management on DigitalOcean and aaPanel, maintaining 99.8% system availability.

Master Communication — Nov. 2019 – Feb. 2020
Internship — *Lahore, Pakistan*
- Acquired knowledge and expertise in Internet Service Provider (ISP) operations, networking principles, and router configuration.
- Managed and maintained existing connections infrastructure, ensuring smooth operation and reliability.

Education

University of the Punjab — Graduated Dec 2021
Bachelor of Science in Computer Science — *Lahore, Pakistan*
